                                                              1
                                                                      5
                               8 351.0 264 4.22 3.170 14.50
## Ford Pantera L
                                                              0
                                                                      5
                                                                            4
                       15.8
                                                                 1
## Ferrari Dino
                        19.7
                               6 145.0 175 3.62 2.770 15.50
                                                                      5
                                                                            6
                               8 301.0 335 3.54 3.570 14.60
## Maserati Bora
                        15.0
                                                              0
                                                                      5
                                                                            8
## Volvo 142E
                        21.4
                               4 121.0 109 4.11 2.780 18.60
                                                                            2
```

Perhaps better is to display the structure:

## str(mtcars)

```
## 'data.frame': 32 obs. of 11 variables:
## $ mpg : num 21 21 22.8 21.4 18.7 18.1 14.3 24.4 22.8 19.2 ...
## $ cyl : num 6 6 4 6 8 6 8 4 4 6 ...
## $ disp: num 160 160 108 258 360 ...
## $ hp : num 110 110 93 110 175 105 245 62 95 123 ...
## $ drat: num 3.9 3.9 3.85 3.08 3.15 2.76 3.21 3.69 3.92 3.92 ...
## $ wt : num 2.62 2.88 2.32 3.21 3.44 ...
```

```
## $ qsec: num 16.5 17 18.6 19.4 17 ...
## $ vs : num 0 0 1 1 0 1 0 1 1 1 ...
## $ am : num 1 1 1 0 0 0 0 0 0 0 ...
## $ gear: num 4 4 4 3 3 3 3 4 4 4 ...
## $ carb: num 4 4 1 1 2 1 4 2 2 4 ...
```

how about plotting gas mileage mpg against number of cylinders cyl?

```
library(ggplot2)
ggplot(mtcars,aes(x=cyl,y=mpg))+geom_point()
```
